

Cricket Team Maker - JavaScript

Functionality:

1. Create a web page for your cricket team. Use local storage to save your cricket team data.
2. Use the following fields for players.
 - a. Player Name (text box)
 - b. Age (up-down counter with plus and minus buttons)
 - c. Player Type: Batsman, Bowler (allow multiple selection)
3. Show list of players.
 - a. Show message "No players are added" on the page when there are no players in the list.
 - b. Hide the message and show the list of players when there are players added.
4. Allow adding players to the list.
 - a. Prevent duplicate players.
 - b. Show proper alert message when trying to add a duplicate player.
 - c. Maximum 11 players can be added.
 - d. Show proper alert message when trying to add more than 11 players.

Tech Stacks:

1. HTML
2. CSS
3. JavaScript

[Note: The assignment should be completed using pure JavaScript. Do not use JQuery or any other JavaScript libraries.]
